

Day/Night Power Supply

Model No.

RS-PS60, RS-PS120

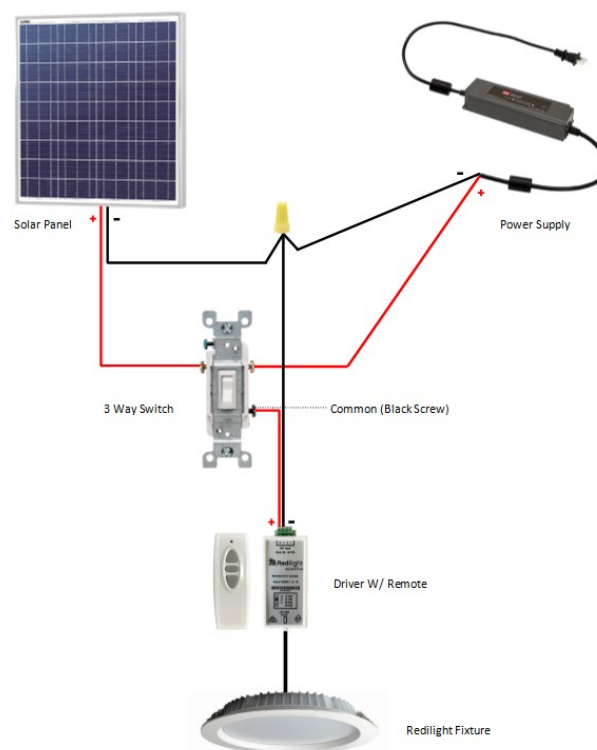

The Redilight Day/Night Power Supply makes it so your Redilight can be more than just a solar light during the day. By integrating the power supply, it allows you to choose between solar power and main power with the flick of a switch, making it possible to use your Redilights at night. A readily available 3 way switch is required to hook up this power supply.
